

S001 Aurelia Home Decor - Account Overview

Account Overview | Business

Document ID	S001-ACC-001	Seller ID	S001
Department	Business	Classification	CONFIDENTIAL
Owner	Aditya Verma	Created Date	2026-09-14
Related Scenario ID	SC-001, SC-004, SC-010	Document Type	Account Overview

1. Account Snapshot

Field	Value
Seller ID	S001
Registered Name	Aurelia Home Decor Pvt. Ltd.
Category	Home & Living - decor, lighting, soft furnishings
Business Model	Own-brand D2C catalogue sold through the marketplace
Account Tier	Gold
Onboarded	2023-02-14
Integration	Nexora Seller API v2 (REST) with webhook order push
Catalogue Size	~9,500 SKUs
Fulfilment	Single seller-owned fulfilment centre, Jaipur
Settlement Cycle	Fortnightly, T+2 payout after cycle close
Account Manager	Aditya Verma (Business)
Support Owner	Rahul Sharma (Support)
Seller Contact	Ritika Bansal, Seller Operations Lead

2. Business Profile

Aurelia Home Decor designs and manufactures its own range of home furnishings. Unlike a reseller, Aurelia controls its entire catalogue, which means listing quality is consistently high and attribute disputes are rare. The trade-off is that production lead times are long: a stock-out on a handwoven product line can take six to eight weeks to recover, so Aurelia manages inventory conservatively and reacts strongly to any platform issue that causes phantom stock or cancelled orders.

Revenue is heavily seasonal. Roughly 38 percent of annual gross merchandise value is transacted between late September and early January, around the festive and wedding seasons. A second, smaller peak occurs in March. The account team plans catalogue campaigns, inventory buffers and support readiness around these two windows.

Aurelia's commercial sensitivity is concentrated in two areas: **settlement accuracy** and **tax correctness**. The finance team at Aurelia reconciles every payout line against its own order export and raises a query whenever the variance exceeds one percent. This is why two of the three scenarios recorded against this account in 2026 are financial rather than technical in origin.

3. Commercial Terms

Term	Value	Notes
Commission band	14.5 percent average	Varies 11-18 percent by sub-category
Settlement frequency	Fortnightly	Standard for Gold tier
Payout lag	T+2 business days after cycle close	Per Payment and Settlement Policy (POL-FIN-002)
Return window	10 days, seller-funded	Decor category standard
Tier review	Annual, next review February 2027	Gold retained in 2026 review
Penalty exposure	SLA credits on late dispatch	Not triggered in 2026

Aurelia has been on Gold tier since February 2024. A Platinum upgrade was discussed during the 2026 annual review but deferred, because Platinum terms require a minimum monthly order volume that Aurelia meets only during the festive window.

4. Integration Profile

Aurelia integrated directly against the Nexora Seller API v2 in 2023, replacing the spreadsheet-based onboarding process it started with. The integration is real-time rather than batch, which distinguishes it from the larger S002 account.

- **Order intake:** webhook push from the Order Service to Aurelia's ERP, with a polling fallback every 15 minutes.
- **Inventory:** direct stock update calls on every warehouse movement; no nightly batch.
- **Catalogue:** listings maintained through the Seller API, with images uploaded through the seller portal.
- **Settlement:** payout statements retrieved through the settlement report endpoint and reconciled inside Aurelia's finance system.
- **Invoicing:** platform-generated tax invoices consumed by Aurelia for GST filing, which is why the February 2026 tax mapping defect was material.

The integration has been stable. Aurelia does not run its own retry storms, and the account has never triggered rate limiting.

5. Account History

Date	Event	Reference
2023-02-14	Seller onboarded on CSV-based listing flow	Onboarding record
2023-09-30	Migrated to Seller API v2 real-time integration	Integration project
2024-02-11	Upgraded from Silver to Gold tier	Annual tier review
2026-02-24	Tax invoice mismatch identified on lighting SKUs	SC-004

Date	Event	Reference
2026-03-12	Settlement shortfall of INR 4,82,000 detected	SC-001
2026-03-14	Shortfall credited after ledger hotfix	SC-001
2026-08-12	Checkout regression affected S001 buyer traffic	SC-010
2026-09-01	Settlement reconciliation hardening project review	Project status

5.1 Scenario SC-004 - Tax Invoice Mismatch (February 2026)

After an HSN revision, newly listed decorative lighting SKUs were not mapped to the 12 percent slab and defaulted to 18 percent. 1,240 invoices were issued at the wrong rate, producing a reconciliation mismatch of INR 2,17,600. The mapping was corrected, credit notes were re-issued and a validation check was added to the listing workflow. The commercial decision and its rationale are recorded in the account decision record.

5.2 Scenario SC-001 - Settlement Shortfall (March 2026)

The settlement batch covering 5 to 9 March 2026 was short by INR 4,82,000. Engineering traced this to a deduplication key defect in the settlement ledger introduced during a schema migration, which double-deducted 1,914 reversal entries. The shortfall was credited on 14 March 2026. This is the highest-severity financial event on the account and remains the reference case for the reconciliation hardening project.

5.3 Scenario SC-010 - Checkout Regression (August 2026)

A platform-wide checkout release defect caused roughly 7 percent of cart-to-payment transitions to fail. Aurelia was not the cause and was one of several affected sellers, but its festive pre-season traffic made the impact visible on the account. The release was rolled back within 34 minutes.

6. Support Profile

Aurelia raises a moderate number of tickets, typically 8 to 14 per quarter, and the distribution is unusual: financial queries outnumber technical ones. Ritika Bansal raises tickets with precise order-level evidence attached, which shortens triage considerably. Rahul Sharma is the named support owner and handles the majority of the account's escalations.

- Settlement and payout queries: approximately 45 percent of ticket volume.
- Invoicing and tax queries: approximately 20 percent.
- Order and checkout failures: approximately 20 percent.
- Catalogue and listing questions: approximately 15 percent.

7. Current Watch Items

1. **Settlement reconciliation hardening.** The project opened after SC-001 is still in progress; automated variance detection is live but the seller-facing variance statement is pending.
2. **Festive readiness.** The account team must confirm inventory buffers and support cover before the late-September peak.
3. **Tax mapping validation.** The control added after SC-004 should be verified once the next HSN revision is published.

8. Internal Ownership and Access

Function	Owner	Department
Commercial relationship	Aditya Verma	Business
Support escalation	Rahul Sharma	Support
Technical remediation	Vikram Singh	Engineering
Platform administration	Admin	IT

S001 sits inside the seller scope of Aditya Verma, Rahul Sharma and Vikram Singh, and is visible organization-wide to Admin. Neha Gupta does not hold S001 in scope and therefore does not appear on this account.
