

S003 GreenCart Organics - Account Overview

Account Overview | Business

Document ID	S003-ACC-001	Seller ID	S003
Department	Business	Classification	CONFIDENTIAL
Owner	Aditya Verma	Created Date	2026-09-14
Related Scenario ID	SC-005, SC-007, SC-009	Document Type	Account Overview

1. Account Snapshot

Field	Value
Seller ID	S003
Registered Name	GreenCart Organics Pvt. Ltd.
Category	Grocery & Fresh - organic produce, staples, wellness
Business Model	Subscription-first grocery with recurring delivery slots
Account Tier	Silver, conditional Gold upgrade in progress
Onboarded	2025-08-11
Integration	Shopify connector bridge to Nexora Seller API
Catalogue Size	~6,200 SKUs
Fulfilment	Dark stores in three cities, perishable handling
Settlement Cycle	Fortnightly, moving to weekly on milestone two
Account Manager	Aditya Verma (Business)
Support Owner	Rahul Sharma (Support)
Seller Contact	Ananya Rao, Co-founder and Operations

2. Business Profile

GreenCart is the youngest account in the portfolio and the only one whose core product is perishable. Its business is built on recurring weekly subscription baskets rather than discrete purchases, which changes almost every operational assumption that applies to the other three sellers.

Subscription orders arrive in predictable batches tied to delivery slots. A delay that would be a minor inconvenience for a decor or footwear order is a total loss for fresh produce: if a same-day slot is missed, the goods are written off rather than re-delivered. GreenCart therefore treats fulfilment SLA as its primary metric and reacts to label or dispatch failures far more sharply than the other sellers.

The company is also small and capital-constrained. Cash-flow timing matters, which is why the January 2026 request for weekly settlement arrived before the account was technically ready for it, and why that request had to be handled as a documented policy exception rather than a routine change.

3. Commercial Terms

Term	Value	Notes
Commission band	9.2 percent average	Grocery category
Settlement frequency	Fortnightly, weekly after milestone two	Conditional, per SC-009
Payout lag	T+2 business days after cycle close	Silver tier standard
Return window	Not applicable for fresh; refund-on-report	Perishable exception
Security deposit	INR 3,00,000	Condition of the SC-009 exception
Tier review	Milestone-based, not annual	Conditional upgrade path

4. Integration Profile

GreenCart did not build a direct integration. It runs its storefront on Shopify and connects through a connector bridge that translates Shopify objects into Seller API calls.

- **Order intake:** webhook from the platform into the connector, then into Shopify order objects.

- **Inventory:** connector-driven stock updates per dark store, with slot-level availability.

- **Fulfilment:** Shipment Label Service used for every dispatch; this is the most operationally critical dependency on the account.

- **Refunds:** refund events flow through the payments webhook consumer, which is the component involved in the September 2026 duplication event.

- **Catalogue:** managed in Shopify and mirrored to the platform.

The connector reduced GreenCart's integration effort but adds a translation layer. Two of the three scenarios on this account involve behaviour at the boundary between the connector and a platform service rather than a defect in GreenCart's own systems.

5. Account History

Date	Event	Reference
2025-08-11	Seller onboarded on Silver tier	Onboarding record
2025-10-02	Subscription slot model enabled	Integration notes
2026-01-15	Tier upgrade and weekly settlement requested	SC-009
2026-01-20	Conditional upgrade approved with milestones	SC-009
2026-06-18	Shipping label failover did not activate	SC-005
2026-09-03	Duplicate refunds issued on 640 orders	SC-007

5.1 Scenario SC-009 - Conditional Tier Upgrade (January 2026)

GreenCart requested a Silver to Gold upgrade together with weekly settlement before its integration readiness milestones were met. Standard onboarding policy did not permit those terms at that readiness level. A conditional upgrade was approved on 20 January 2026 with phased milestones and a INR 3,00,000 security deposit, with settlement frequency moving to weekly only after milestone two is validated.

5.2 Scenario SC-005 - Shipping Label Failover (June 2026)

The primary courier provider degraded and automatic failover to the backup provider did not activate because the stored backup credentials had expired. 2,100 orders were stuck in label-pending state and 640 perishable orders breached delivery SLA. Credentials were rotated, failover was executed manually and a credential-expiry monitor was added.

5.3 Scenario SC-007 - Duplicate Refunds (September 2026)

The refund webhook consumer processed at-least-once deliveries without an idempotency check, so a broker redelivery applied 640 refunds twice, an excess of INR 1,18,000. An idempotency store was added and duplicates were reversed. Given GreenCart's cash position, the recovery was sequenced to avoid a single large debit.

6. Support Profile

GreenCart raises few tickets, typically 5 to 9 per quarter, but severity skews high because perishable delivery failures cannot be retried. Ananya Rao usually contacts support directly rather than through a ticket portal, so Support records the call and raises the ticket on her behalf.

- Fulfilment, labels and dispatch: approximately 50 percent of volume.
- Refunds and payments: approximately 30 percent.
- Connector and catalogue behaviour: approximately 20 percent.

7. Current Watch Items

1. **Milestone two validation.** Weekly settlement is blocked until the integration readiness milestone is signed off by Operations.
2. **Failover assurance.** The credential-expiry monitor added after SC-005 must be confirmed as covering both courier providers.
3. **Refund reconciliation.** Recovery of the SC-007 excess is being staged across settlement cycles and needs monthly confirmation.

8. Internal Ownership and Access

Function	Owner	Department
Commercial relationship	Aditya Verma	Business
Support escalation	Rahul Sharma	Support
Platform administration	Admin	IT

S003 sits inside the seller scope of Aditya Verma only, and is visible organization-wide to Admin. Rahul Sharma handles S003 tickets through the support queue but does not hold S003 in his assigned seller scope, so cross-account reporting on this seller is produced by the account manager.
